

# LANDING ZONE GUIDELINES

Please Follow These Guidelines To Establish A Safe Landing Zone

- 1. Identify one communications officer who:
  - o Has a good sense of direction
  - o Is familiar with the area
  - Is free from providing direct care to the patient(s)
- 2. Call STAT MedEvac Communications Center at 800-633-STAT or 412-647-7828 and provide the following information so that the closest aircraft can be dispatched to your location:
  - Unit calling/call sign
  - o Radio frequency
  - Number of aircraft needed
  - Location/Landmarks
- 3. Guidelines to prepare a safe Landing Zone (LZ)
  - o Minimum 60 x 60 feet
  - o Ideal 100 x 100 feet
  - o < 10 degree slope
  - Free from debris, obstruction, hazards (i.e., wires, fences, trees, loose objects)
  - Mark each corner (independent lighting system, flares, cones, emergency vehicles)

- 4. Once contact has been made with the pilot provide the following information: Landmarks:
  - o Water / radio towers
  - o Schools
  - o Tennis courts
  - Swimming pools
  - High Power Lines
  - o Major road intersections

#### **LZ Descriptions:**

- o Type of LZ (i.e., field, road, construction site)
- o LZ surface (i.e., field, grass, concrete, gravel, dirt, snow covered
- o Boundaries of LZ (i.e., trees, houses, wires, picket fences, towers)
- Approach and departure pathways
- 5. Notify the pilot when you:

- Hear the aircraft
- See the aircraft
- Direct the pilot to your location using the clock method

# 6. Once contact has been made with the pilot provide the following information: Landmarks:

- Water / radio towers
- o Schools
- o Tennis courts
- o Swimming pools
- o High Power Lines
- Major road intersections

#### **LZ Descriptions:**

- o Type of LZ (i.e., field, road, construction site)
- o LZ surface (i.e., field, grass, concrete, gravel, dirt, snow covered
- o Boundaries of LZ (i.e., trees, houses, wires, picket fences, towers)
- o Approach and departure pathways

### 7. Notify the pilot when you:

- o Hear the aircraft
- See the aircraft
- o Direct the pilot to your location using the clock method

## REMEMBER: WHEN USING THE CLOCK METHOD THE PILOT IS FACING 12 O'CLOCK!

- 8. Landing/Lift-off Safety Guidelines:
  - o Cover your eyes
  - Never approach the aircraft unless directed by the pilot and/or medical crew, then only approach the aircraft from the front
  - o Keep vehicles 30 feet away
  - o Keep crowds 100 feet away
  - o No objects or people in the middle of the LZ
  - No flash cameras/white lights
  - o No running/smoking
- 9. After adequate landing information has been given to the pilot, provide the medical crew with the following information:
  - o Mechanism of injury
  - o Injury assessment
  - Treatment administered
